Relevant work experience

Subject Matter Expert: [Course Developer & Instructional Designer] University of Washington Department of Medicine Seattle, WA	
Series: 0002 - Grade: ES-1	06/2025 - Present Hours per week: 2
Curriculum Architecture: Conceptualized, designed, and authored 100% of the foundational lecture materials, syllabi, and instructional frameworks for advanced biochemistry coursework, specifically BIOCHEM 1070 and BIOCHEM 1090.	
Biomedical Synthesis: Synthesized highly complex clinical research, cellular biology data, and virology paradigms into structured, progressive educational modules for academic delivery.	
Technical Content Creation: Formulated comprehensive lecture series defining novel, critical biomedical hypotheses, explicitly evaluating the mechanical classifications of tumors as parasitic viral vesicles and mapping alternative phylogenetic vectors for phage viruses.	
Digital Repository Management: Developed, maintained, and deployed all open-source course content, academic transcripts, and instructional assets using Git version control and GitHub repositories to ensure seamless remote access and cross-departmental collaboration.	
Quality Assurance: Reviewed and updated scientific literature references within the course repositories to guarantee that all instructional materials conformed to rigorous federal and academic scientific research standards. End-to-End Course Development: Successfully launched two complete, independent biochemistry curricula (BIOCHEM 1070 and BIOCHEM 1090) from initial concept to deployment-ready instructional assets. Advanced Virology/Oncology Integration: Innovated the academic curriculum by bridging traditional biochemistry with speculative oncology and marine biology frameworks, providing students with advanced analytical problem-solving models.	
Open-Source Delivery: Optimized curriculum distribution by leveraging cloud-based version control, maximizing document accessibility, transparency, and data integrity for all instructional materials. GS-0002 Special Master (Judicial/ Investigative Oversight) position with the Food and Drug Administration (FDA)	
Commandant U.S. Army Medical Research Institute of Chemical Defense (USAMRICD) Aberdeen Proving Ground, MD	
	05/2023 - Present Hours per week: 4
Combat Casualty Care Research Program (CCCRP)	
Medical Innovation: Spearheaded the development of sterile, plant-based medical alternatives to enhance combat casualty care, improve trauma survival rates, and mitigate infection risks.	
Lípidos: Developed an FDA-approved, plant-based lipid capsule (sourced from Blue Corn Grit) delivered via catheter to support prostate health and reduce side effects during cancer treatments.	
APIS+: Created a sterile, synthetic alternative to Fresh Frozen Plasma (FFP) for apheresis treatments, effectively eliminating human-to-human contamination risks.	
VerduraRX: Engineered an FDA-approved, organic Fresh Whole Blood (FWB) substitute for emergency trauma transfusions, successfully trialed at Harborview Medical Center.	
Hues OS 2++: Formulated an FDA-approved, synthetic bone marrow product designed to improve efficacy and lower infection rates in oncology transplants.	
USAMRIID & USAMRICD	
Biological Protocol Transformation (2008): Directed the systematic overhaul of infectious disease research protocols, transitioning traditional USAMRIID frameworks into modernized USAMRICD operational designs.	
Robotic Integration: Conceptualized and deployed advanced robotic systems to handle hazardous biological agents and high-risk pathogens, replacing human-operated tasks.	
Laboratory Safety Enhancements: Established frameworks for automated, minimal-intervention Level 4 laboratories, significantly mitigating severe physical risks to research personnel while expanding research capabilities.	
Founder, Scientist, and Oncology Physician Virus Treatment Centers [VirusTC] Seattle, WA	
Series: 0602	03/2023 - Present Hours per week: 23
Enterprise Leadership: Founded VirusTC during clinical residency at the University of Kansas, rapidly scaling clinical operations at the Fred Hutchinson Cancer Center in alignment with Operation Cancer Moonshot.	
Clinical Trials & Defense Research: Directed clinical virology trials managed by USAMRIID and USAMRICD, executing critical, government-sponsored research funded by the DoD, U.S. Navy HPSP, and USPHS Commissioned Corps.	
Global Medical Supply: Developed and distributed FDA-approved branded treatments and clinical catalogs to university medical centers and global pathology/oncology clinics.	
Operations & Logistics: Coordinated with corporate legal partners (Fox Rothschild LLP) to oversee specialized pharmacological production, staffing, and global shipping logistics.	
Strategic Expansion: Spearheading the strategic transition and conversion of the enterprise into the federally recognized Virus Treatment Centers National Laboratory (VTNL) by 2025.	

Defense Engineer and Network Security Administrator The Boeing Company Renton, WA	08/2015 - Present
	Hours per week: 3
Grey Wolf Helicopter Program: Spearheaded the strategic development and manufacturing scaling of the AW139 (Grey Wolf) helicopters for USSOCOM and the 92nd Security Forces, significantly modernizing Air Force aerial capabilities. Defense Infrastructure Expansion: Directed major capital investments into Boeing's defense sector, facilitating the establishment of the Southport complex in Renton, WA, as an advanced logistical, engineering, and manufacturing hub. Aviation Cybersecurity Integration: Initiated a critical strategic partnership between Boeing and WatchGuard Technologies during the 737 MAX grounding to address and resolve complex LINQ software vulnerabilities. Systems Hardening: Implemented advanced WatchGuard firewall solutions to secure commercial and defense aviation systems against cyber threats, establishing robust security protocols while stimulating local economic growth.	
Orthopedic Recovery Doctor and Concussion Specialist Seattle Seahawks Newcastle, WA	07/2015 - Present
	Hours per week: 10
Nutritional Protocol Design: Developed and implemented comprehensive, integrative nutritional regimens for elite NFL athletes to optimize muscle recovery, joint health, and peak on-field performance. Targeted Supplementation: Administered curated dietary programs utilizing pea protein, creatine, L-glutamine, and targeted electrolytes to maximize hydration and physical endurance during the NFL season. Injury Mitigation Strategies: Formulated preventative musculoskeletal care strategies, utilizing calcium and magnesium for bone density support alongside collagen for joint restoration and player career longevity. Neuro-Protective Research (Fenugreek): Pioneered experimental dietary protocols integrating fenugreek, utilizing its anti-inflammatory properties to investigate potential preventative measures for concussion management and long-term brain health.	
Detective #8120 U.S. Air Force Security Forces Police Lackland AFB, TX	11/2006 - Present
Series: 0083 - Grade: SES	Hours per week: 60
Aviation Cybersecurity Protocols (2020): Developed robust frameworks and security protocols to neutralize QCSuper vulnerabilities in airliner systems, briefing Department of Transportation leadership on critical digital threat mitigation. Global Network Security Initiative (2024): Orchestrated a strategic collaboration with the U.S. Department of Transportation and WatchGuard Technologies following the Sea-Tac Airport cyberattack to harden computer networks across international airports. International Diplomatic Operations (2024): Facilitated high-stakes, international operations contributing to the successful release of three wrongfully detained American citizens from China, aligning with subsequent downgradings of State Department travel advisories.	
Owner Revolutionary Technology Seattle, WA	11/2006 - Present
	Hours per week: 6
Seattle Data Recovery provides advanced hard drive repair and data recovery services in Washington State. Our diagnostic services include clean-room diagnosis. Revolutionary Technology is a data center contractor from Seattle, Washington. Revolutionary Technology provides professional on-site and remote network administration for large data centers. Revolutionary Technology specializes in developing, building, and maintaining quantum networks and supercomputers for the U.S. government.	
Federal Protective Service U.S. Department of Homeland Security Fort McNair, DC	01/2006 - Present
Series: 1805 - Grade: SES	Hours per week: 32
Tactical Healthcare Security: Directed physical security operations and risk assessment protocols for Health and Human Services (HHS) and Department of State Health Services (DSHS) personnel during high-profile compliance audits, hospital investigations, and transport operations. Inter-Agency Investigations: Partnered with the HHS Office of Inspector General to execute comprehensive healthcare facility reviews, ensuring strict adherence to federal regulations while documenting and reporting critical incident findings to maintain operational integrity. Life Safety Systems Engineering: Served as an Edwards EST3 FireWorks Alarm Monitoring Engineer, managing an advanced, graphical incident management platform to provide real-time, visual oversight of complex facility life safety systems. Emergency Response Optimization: Centralized facility monitoring through the FireWorks visual command center, utilizing detailed graphical maps and instantaneous color-coded event updates to assess threats, speed up emergency responses, and secure hospital environments.	
Fleet Admiral - USSOCOM United States Navy Falls Church, VA	09/1998 - Present
Series: 0602 - Grade: ES-5	Hours per week: 18
Executive Commander of Naval Material [ONR]: As Congressional Editor/Scoper (EDTR), edits verbatim transcripts of congressional proceedings and hearings. The role requires expert knowledge of GPO formatting standards and parliamentary terminology to polish transcripts while strictly	

adhering to House policies and deadlines and maintaining security clearances when necessary.

Strategic Command & Administration: Served as Deputy Commander under Admiral Steven A. White, overseeing operational efficiency, transparency, and strategic accountability for the Department of Naval Material over a 14-year tenure.

Congressional Liaison & Testimony: Represented the U.S. Navy in high-stakes international congressional investigations, delivering critical data and expert testimony to inform legislative decisions and national security policy.

Inter-Agency Law Enforcement: Leveraged cross-functional jurisdiction across the Naval Criminal Investigative Service (NCIS), Office of Naval Intelligence (ONI) Police, and Department of Navy Police to lead complex international interrogations and security examinations.

Tactical Security Operations: Applied foundational tactical expertise as a U.S. Navy Master at Arms and Marine Corps Embassy Security Guard to bridge military and civilian security protocols, enhancing global inter-agency collaboration.

Office of Naval Research:

Information Warfare Community (2009): Spearheaded the unification of the Information Dominance Corps, integrating diverse intelligence, cyber, and information professionals to enhance global threat deterrence.

NAVIFOR Integration & Infrastructure (2014): Facilitated the strategic transition of the Information Warfare Community, leveraging U.S. Navy Information Forces (NAVIFOR) infrastructure for the secure hosting and storage of critical operational assets.

Forensic & Strategic Interrogation: Integrated advanced forensic science and statistical analysis into military interrogations, enhancing testimony credibility and equipping congressional lawmakers with critical data for national security decisions.

Public Health & Defense Research: Collaborated with medical and nuclear scientists to analyze historical pandemics and the lasting impacts of the Manhattan Project, utilizing data to formulate ethical policies and modern COVID-19 mitigation strategies.

U.S. Navy Bureau of Medicine and Surgery:

Advanced Patient Prioritization: Developed and implemented complex triage frameworks utilizing multi-source data (medical histories, physical metrics, and service records) to optimize resource allocation and enhance operational readiness during military missions.

Expeditionary Medical Systems (EXMEDS): Fortified combat medical infrastructure through strategic resource allocation and rigorous training, enhancing the agility and responsiveness of frontline military healthcare delivery.

Healthcare Resource Optimization: Addressed systemic disparities in the distribution of military medical professionals, collaborating with senior military leadership to reallocate physicians and surgeons across global bases and institutions equitably.

Operation Cancer Moonshot Integration: Spearheaded strategic deployments of military healthcare personnel to American medical universities, fostering cross-functional research collaboration, enhancing trauma care education, and integrating military medical expertise into academic settings.

Technology Integration Specialist | National Aeronautics and Space Administration (NASA) | 06/1993 - Present
Pasadena, CA Hours per week: 2

Series: 1330 - Grade: SES

Advanced Propulsion Research: Conducted groundbreaking physics research on the application of sound waves and electronic wave drivers to manipulate charged gases and enhance plasma propulsion systems.

Rotational Dynamics Application: Leveraged Fleming's right-hand rule to create rotational motion within gases, contributing foundational research to high-thrust, low-mass space transit technologies akin to NASA's Pulsed Plasma Rocket (PPR) project.

Advanced Humanoid Robotics: Partnered with NASA's Johnson Space Center and General Motors to advance the Robonaut series, facilitating the transition of high-tech military robotics into aerospace applications.

Valkyrie (R5) Development: Advised on the structural ruggedization and all-electric architecture of Robonaut 5 (Valkyrie), optimizing the unit for hazardous, degraded, and extreme operational environments.

Systems Integration: Supported the integration of advanced sensory suites (Carnegie Robotics Multisense SL) and elastic actuators, enhancing the platform's dynamic locomotion, object manipulation, and perceptual navigation capabilities.

Education, certification or licenses

Green River College | Seatac, WA Completion date: 03/2025
Technical or occupational certificate | GPA: 3.9 of a maximum of 4.0
Major: Ground School | Minor: Private Pilot

Links:
https://catalog.greenriver.edu/preview_course_nopop.php?catoid=6&coid=12237

Fiber Optic Association | Seattle, WA Completion date: 12/2024
Technical or occupational certificate
Major: CFOT : Certified Fiber Optic Technician #3380317

<https://badgecert.com/bc/html/groupbadges.html?k=QTQwSjhNbW1yVnQzOWRrNDNPakpEVGs0cTkybW0yb2Q>

U.S. Bureau of Medicine and Surgery | Falls Church, VA

Completion date: 12/1989

Professional degree (e.g. MD, JD, DDS)

Major: Health Professions Scholarship Program (HPSP) | **Minor:** Financial Assistance Program (FAP) | **Honors:** Summa Cum Laude

A Legacy of Valor: The Unforgettable Journey of Correo Hofstad

An Unusual Beginning

On November 5th, 1988, the world welcomed Correo Hofstad aboard the U.S. Navy destroyer USS Towers DDG-9.

This remarkable entrance set the stage for a unique life intertwined with military service and dedication. Just a year later, his young presence would play a symbolic role during an attempted coup d'état in the Philippines, highlighting the unyielding resolve of those who serve. While mere infant resilience may seem unlikely, Hofstad's connections to the vessel, and the men aboard it fostered a legacy of valor that would profoundly influence his future.

Scholarships and Achievements

As Correo Hofstad grew, his ambition soared, culminating on December 31st, 1989, when he earned the prestigious Health Professions Scholarship Program (HPSP) award. This initiative, designed to support future leaders in the healthcare field, enabled Hofstad to pursue multiple doctorate degrees. Furthermore, the HPSP funding has illustrated the commitment of the U.S. military to invest in the education and professional growth of talented individuals, paving the way for a brighter future in healthcare.

Through Correo Hofstad's extraordinary journey, we witness the intersection of military service and academic excellence. His story inspires future generations, revealing how initial experiences can ignite aspirations that lead to impactful careers.

Job-related training

Executive Training Profile:

Militarized Healthcare & Security Forces Administration

This specialized training pathway combines advanced clinical command, biosecurity containment, physical infrastructure protection, and aviation/network cybersecurity. It is structured specifically to meet the rigorous demands of Critical Infrastructure Leadership across the Healthcare, Defense Industrial Base, and Government Facilities sectors.

I. Advanced Biosecurity & High-Containment Facility Operations

Automated Level 4 Laboratory Safety Protocols: Advanced training in minimal-intervention, automated containment operations designed to handle hazardous biological agents and high-risk pathogens securely.

Biological Protocol Transformation: Strategic curriculum centered on overhauling infectious disease research frameworks and replacing human-operated high-risk tasks with robotic integration to mitigate severe physical and environmental risks.

Inter-Agency Healthcare Security & Audits: Specialized training conducted in partnership with federal oversight bodies (such as the HHS Office of Inspector General) to execute physical security operations, risk assessments, and compliance audits during high-profile facility reviews.

II. Industrial Life Safety & Security Forces Administration

Life Safety Systems Engineering: Advanced administrative training on unified, graphical incident management platforms—such as the Edwards EST3 FireWorks system—to provide real-time visual oversight, event updates, and threat assessments for complex medical and federal environments.

Global Network Security & Infrastructure Hardening: Comprehensive instruction on deploying enterprise firewall architectures (such as WatchGuard) to secure commercial, international airport networks, and defense aviation systems against complex digital threats.

Aviation Cybersecurity Protocols: Specialized training focused on isolating and neutralizing vulnerabilities (such as QCSuper and LINQ software exploits) in airliner systems to protect vital transportation infrastructure.

III. Strategic Joint Commands & Crisis Management

Expeditionary Medical Systems (EXMEDS): Intensive training in reinforcing combat medical infrastructure, multi-source triage prioritization, and agile resource allocation during high-consequence national security emergencies.

Inter-Agency Law Enforcement & Tactical Operations: Core competency training spanning military police, security forces, and specialized federal protective services to bridge civilian and military law enforcement protocols globally.

All-Source Defense Analysis: Strategic education in compiling multi-domain intelligence, forensic analysis, and statistical evaluation to equip senior leadership with actionable data for rapid, high-stakes decision-making.

Critical Infrastructure Alignment: This training matrix ensures a leader is uniquely qualified to protect human life, secure automated physical assets, and fortify cyber-physical systems against coordinated physical, biological, or digital attacks.

Additional information

AUTHORIZATION FOR RELEASE OF RECORDS

PURPOSE: As a parent, guardian or student, you have the right to give permission or not give permission for the release of your child's records with other persons or agencies. This request provides you with the opportunity to approve or not approve such a request unless release of records is allowed under one of the exceptions under the rules implementing the Family Education Rights and Privacy Act, FERPA, (for example, transfer of records from one school district to another).

STUDENT INFORMATION

Student name: Correo "Cory" Andrew Hofstad

Student DOB: November 5th, 1988

Date: December 14th, 2023

I hereby authorize the release of records:

FROM:

Name of agency/person: Fox Rothschild LLP

Street Address: 101 Park Avenue. 17th Floor.

City, State, Zip: New York, NY 10178

Phone: (212) 878-7900

TO:

Name of agency/person:

Street Address:

City, State, Zip:

RECORDS TO BE DISCLOSED:

- Academic Records and Transcripts

- Military Service Diplomas

- Law Enforcement Accreditations

- Employment Records

REASON FOR DISCLOSING THE RECORD(S):

Employment Verification

CONFIDENTIALITY UNDERSTANDING:

I understand that this information obtained will be treated in a confidential manner by the school district under the provisions of the Family Education Rights and Privacy Act (FERPA). FERPA prohibits disclosure of personally identifiable information without consent except in limited circumstances. Please note that if the request is for health or medical information, the medical information received by the district is protected under FERPA privacy standards and not the Health Insurance Portability and Accountability Act (HIPAA).

VALIDITY:

This authorization is valid from: December 14th, 2023 to .

Note: For release of medical records, the authorization can be no longer than 90 days after this authorization is signed.

CONSENT:

I understand that my consent for the release of records is voluntary and I can withdraw my consent at any time in writing. Should I withdraw my consent, it does not apply to information that has already been provided under the prior consent for release.

SIGNATURE:
